Volume 174 1988

FEBS

European Journal of Biochemistry

Honorary Chairman
Frederick Sanger (Cambridge)

Managing Editors
Philipp Christen (Zürich), Michael J. Clemens (London), S. P. Datta (London), Eberhard Hofmann (Leipzig) *reviews editor*, Louis Hue (Bruxelles), Pierre Jollès (Paris), Claude Liébecq (Liège) *senior managing editor*, Walter Neupert (München), David G. Nicholls (Dundee), and Cees Veeger (Wageningen)

Editorial-Advisory Board
R. Arnon (Rehovot), S. Avrameas (Paris), B. E. C. Banks (London), A. Bernardi (Gif-sur-Yvette), H. Betz (Heidelberg), T.A. Bickle (Basel), J. Bremer (Oslo), A. Cornish-Bowden (Marseille), R. Cortese (Heidelberg), C. Crane-Robinson (Portsmouth), M. Crompton (London), J. Demaille (Montpellier), L. B. Dolapchiev (Sofiya), J. O. Dolly (London), H. Durchschlag (Regensburg), J. Duszynski (Warszawa), H. Eisenberg (Rehovot), H. Fasold (Frankfurt), J. Filipski (Paris), J. Finne (Kuopio), A. Fontana (Padova), F. Franěk (Praha), D. C. Gallwitz (Göttingen), G. P. Georgiev (Moskva), S. Ghisla (Konstanz), F. Goñi (Bilbao), H. Grosjean (Rhode-St-Genèse), D. G. Hardie (Dundee), D. H. Hayes (Paris), C.-H. Heldin (Uppsala), F. W. Hemming (Nottingham), A. Henschen-Edman (Martinsried), H. Hilz (Hamburg), F. Hofmann (Homburg), F. Hucho (Berlin), M. Jacob (Strasbourg), K. H. Jakobs (Heidelberg), H. Jörnvall (Stockholm), K. Jungermann (Göttingen), M. Klingenberg (München), W. N. Konings (Haren), R. Kraayenhof (Amsterdam), G. Kreil (Salzburg), L. Lehle (Regensburg), J.-M. Lhoste (Orsay), K. Martinek (Praha), M. Monsigny (Orléans), A. Paraf (Monnaie), I. Pecht (Rehovot), G. Pettersson (Lund), L. A. Pinna (Padova), A. Puigserver (Marseille), T. A. Rapoport (Berlin), J. G. Reich (Berlin), J. Rétey (Karlsruhe), J. Ricard (Marseille), E. Rickli (Bern), H. Rüterjans (Frankfurt), M. V. Saraste (Helsinki), M. C. Scrutton (London), V. Sgaramella (Pavia), A. E. Sippel (Heidelberg), V. P. Skulachev (Moskva), C. Sluse-Goffart (Liège), J. M. Tager (Amsterdam), I. P. Trayer (Birmingham), V. Ullrich (Konstanz), P. Venetianer (Szeged), A. Verbert (Villeneuve-d'Ascq), P. V. Vignais (Grenoble), J. F. G. Vliegenthart (Utrecht), K. von Figura (Göttingen), R. J. P. Williams (Oxford), K. W. A. Wirtz (Utrecht), A. V. Xavier (Lisboa), W. Zillig (Martinsried), H. Zuber (Zürich)

International Union of Biochemistry (IUB) and International Council of Scientific Unions (ICSU) 1

Review

The regulation of the intracellular pH in cells from vertebrates
C. Frelin, P. Vigne, A. Ladoux and M. Lazdunski 3–14

Nucleic acids, protein synthesis, and molecular genetics

Cloning and nucleotide sequence of a heat-stable amylase gene from an anaerobic thermophile, *Dictyoglomus thermophilum*
S. Fukusumi, A. Kamizono, S. Horinouchi and T. Beppu 15–21

Identification and sequence determination of a cDNA clone for tomato pectin esterase
J. Ray, J. Knapp, D. Grierson, C. Bird and W. Schuch 119–124

Three types of rat U1 small nuclear RNA genes with different flanking sequences are induced to express *in vivo*
N. Watanabe and Y. Ohshima 125–132

Existence of malfunctioning proα2(I) collagen genes in a patient with a proα2(I)-chain-defective variant of Ehlers-Danlos syndrome
R. Hata, S. Kurata and H. Shinkai 231–237

Purification and properties of a specific primase-stimulating factor of bovine thymus
A. Itaya, T. Hironaka, Y. Tanaka, K. Yoshihara and T. Kamiya 261–266

Plastid-localised seed acyl-carrier protein of *Brassica napus* is encoded by a distinct, nuclear multigene family
R. Safford, J. H. C. Windust, C. Lucas, J. De Silva, C. M. James, A. Hellyer, C. G. Smith, A. R. Slabas and S. G. Hughes 287–295

Regulation of two interferon-inducible human genes by interferon, poly(rI) · poly(rC) and viruses
M. G. Wathelet, I. M. Clauss, J. Content and G. A. Huez 323–329

Isolation, structure and expression of cDNA and genomic clones for murine eosinophil differentiation factor — Comparison with other eosinophilopoietic lymphokines and identity with interleukin-5
H. D. Campbell, C. J. Sanderson, Y. Wang, Y. Hort, M. E. Martinson, W. Q. J. Tucker, A. Stellwagen, M. Strath and I. G. Young 345–352

Structural organization of satellite I chromatin of calf liver
M. Pagès and G. Roizès 391–398

The isolation and characterisation of human atrial natriuretic factor produced as a fusion protein in *Escherichia coli*
J. A. Knott, C. A. Sullivan and A. Weston 405–410

Expression of atrial natriuretic factor as a cleavable fusion protein with chloramphenicol acetyltransferase in *Escherichia coli*
C. W. Dykes, A. B. Bookless, B. A. Coomber, S. A. Noble, D. C. Humber and A. N. Hobden 411–416

The sheep metallothionein gene family — Structure, sequence and evolutionary relationship of five linked genes
M. G. Peterson, F. Hannan and J. F. B. Mercer 417–424

Differential expression of four linked sheep metallothionein genes
M. G. Peterson and J. F. B. Mercer 425–429

Immunoelectron microscopic localisation of ribosomal proteins from *Bacillus stearothermophilus* that are homologous to *Escherichia coli* L1, L6, L23 and L29
W. Hackl and M. Stöffler-Meilicke 431–435

Induction and repression of cellular gene transcription during Herpes simplex virus infection are mediated by different viral immediate-early gene products
L. M. Kemp and D. S. Latchman 443–449

Ricin and α-sarcin alter the conformation of 60S ribosomal subunits at neighboring but different sites
K. Terao, T. Uchiumi, Y. Endo and K. Ogata 459–463

Expression of a DNA-ligase-stimulatory factor in Bloom's syndrome cell line GM1492
K. Kenne and S. Ljungquist 465–470

Effects of the *Xenopus laevis* mitochondrial single-stranded DNA-binding protein on the activity of DNA polymerase γ
B. Mignotte, J. Marsault and M. Barat-Gueride 479–484

Identification and isolation of glucose dehydrogenase genes of *Bacillus megaterium* M1286 and their expression in *Escherichia coli*
H. J. Heilmann, H. J. Mägert and H. G. Gassen 485–490

Cloning and expression of a β tubulin gene of *Physarum polycephalum*
A. K. Werenskiold, B. Poetsch and F. Haugli 491–495

Identification of a cDNA clone for sorghum leaf malate dehydrogenase (NADP) — Light-dependent mRNA accumulation
C. Crétin, P. Luchetta, C. Joly, M. Miginiac-Maslow, P. Decottignies, J.-P. Jacquot, J. Vidal and P. Gadal 497–501

Human aldolase A gene — Structural organization and tissue-spezific expression by multiple promotors and alternate mRNA processing
P. Izzo, P. Costanzo, A. Lupo, E. Rippa, G. Paolella and F. Salvatore 569–578

Cloning and expression of cDNA for human vascular anticoagulant, a Ca^{2+}-dependent phospholipid-binding protein
I. Maurer-Fogy, C. P. M. Reutelingsperger, J. Pieters, G. Dodo, C. Stratowa and R. Hauptmann 585–592

The dihydrolipoyltransacetylase component of the pyruvate dehydrogenase complex from *Azotobacter vinelandii* — Molecular cloning and sequence analysis
R. Hanemaaijer, A. Janssen, A. de Kok and C. Veeger 593–599

Studies of a novel repetitive sequence family in the genome of mice
M. Decoville, B. Malfoy and D. Locker 679–684

Protein chemistry and structure

Polymerization of actin modified with fluorescein isothiocyanate
L. Miller, M. Phillips and E. Reisler 23– 29

Monoclonal antibodies reveal evolutionary conservation of alternative splicing of the α A-crystallin primary transcript
W. Hendriks, J. Sanders, L. de Leij, F. Ramaekers, H. Bloemendal and W. W. de Jong 133–137

Polymerization and gelation of fibronogen in D_2O
U. Larsson 139–144

Crystals of modified bovine neurophysin II
J. P. Rose, D. Yang, C. S. Yoo, M. Sax, E. Breslow and B.-C. Wang 145–147

A peptide from the eel pancreas with structural similarity to human pancreatic secretory trypsin inhibitor
J. M. Conlon and L. Thim 149–153

Properties of N-terminal truncated yeast aspartyl-tRNA synthetase and structural characteristics of the cleaved domain
B. Lorber, H. Mejdoub, J. Reinbolt, Y. Boulanger and R. Giegé 155–161

Protein-kinase-C-catalyzed phosphorylation of the microtubule-binding domain of microtubule-associated protein 2 inhibits its ability to induce tubulin polymerization
M. Hoshi, T. Akiyama, Y. Shinohara, Y. Miyata, H. Ogawara, E. Nishida and H. Sakai 225–230

Isolation and characterization of porcine diazepam-binding inhibitor, a polypeptide not only of cerebral occurrence but also common in intestinal tissues and with effects on regulation of insulin release
Z. Chen, B. Agerberth, K. Gell, M. Andersson, V. Mutt, C.-G. Östenson, S. Efendić, J. Barros-Söderling, B. Persson and H. Jörnvall 239–245

NADH oxidase from the extreme thermophile *Thermus aquaticus* YT-1 — Purification and characterisation
D. Cocco, A. Rinaldi, I. Savini, J. M. Cooper and J. V. Bannister 267–271

The disaggregation of calcium-depleted casein micelles
M. C. A. Griffin, R. L. J. Lyster and J. C. Price 339–343

Crystal structure of human dihydrofolate reductase complexed with folate
C. Oefner, A. D'Arcy and F. K. Winkler 377–385

A photo-chemically induced dynamic nuclear polarization NMR study on rabbit and bovine cytochrome b_5
A. Hori, F. Hayashi, Y. Kyogoku and H. Akutsu 503–508

Amino acid sequence of a calcium-binding protein (TCBP-10) from *Tetrahymena*
T. Kobayashi, T. Takagi, K. Konishi, K. Ohnishi and Y. Watanabe 579–584

Conformational alterations detected by circular dichroism induced in the normal *ras* p21 protein by activating point mutations at position 12, 59, or 61
A. Valencia, L. Serrano, R. Caballero, P. S. Anderson and J. C. Lacal 621–627

Role of the N-terminus of rat pheochromocytoma tyrosine hydroxylase in the regulation of the enzyme's activity
E. Bonnefoy, P. Ferrara, H. Rohrer, F. Gros and J. Thibault 685–690

Enzymology

Potentiation and suppression of mouse liver cytochrome *P*-450 isozymes during the acute-phase response induced by bacterial endotoxin
L. A. Stanley, D. J. Adams, R. Lindsay, R. R. Meehan, W. Liao and C. R. Wolf 31– 36

A novel fungal enzyme, NADPH-dependent carbonyl reductase, showing high specificity to conjugated polyketones — Purification and characterization
S. Shimizu, S. Hattori, H. Hata and H. Yamada 37– 44

The influence of fibrin(ogen) fragments on the kinetic parameters of the tissue-type plasminogen-activator-mediated activation of different forms of plasminogen
W. Nieuwenhuizen, M. Voskuilen, A. Vermond, B. Hoegee-de Nobel and D. W. Traas 163–169

Influence de la polymérisation de la D-aminoacide oxydase sur le comfortement de l'enzyme immobilisée sur chitosane par fixation covalente / Influence of polymerization of the D-amino-acid oxidase on the behaviour of the enzyme-covalently immobilized on chitosan
A. Lemainque, J. Braun and F. Le Goffic 171–176

The NADPH-linked acetoacetyl-CoA reductase from *Zoogloea ramigera* — Characterization and mechanistic studies of the cloned enzyme over-produced in *Escherichia coli*
O. Ploux, S. Masamune and C. T. Walsh 177–182

Electron transfer between the hydrogenase from *Desulfovibrio vulgaris* (Hildenborough) and viologens — 1. Investigations by cyclic voltammetry
J. C. Hoogvliet, L. C. Lievense, C. Van Dijk and C. Veeger 273–280

Electron transfer between the hydrogenase from *Desulfovibrio vulgaris* (Hildenborough) and viologens — 2. Investigations by chronoamperometry
J. C. Hoogvliet, L. C. Lievense, C. Van Dijk and C. Veeger 281–285

Purification of an insulin-sensitive cyclic AMP phosphodiesterase from rat liver
S. Boyes and E. G. Loten 303–309

Kinetic and spectral studies on the redox forms of methanol dehydrogenase from *Hyphomicrobium* X
J. Frank Jzn, M. Dijkstra, J. A. Duine and C. Balny 331–338

The stereochemical course of D-glyceraldehyde-induced ATPase activity of glycerokinase from *Escherichia coli*
R. C. Bethell and G. Lowe 387–389

The 20α-hydroxysteroid dehydrogenase of *Streptomyces hydrogenans*
R. L. Rimsay, G. W. Murphy, C. J. Martin and J. C. Orr 437–442

Purification and properties of 4-hydroxycyclohexanecarboxylate dehydrogenase from *Corynebacterium cyclohexanicum*
H. Obata, M. Uebayasi and T. Kaneda 451–458

Purification and characterization of cytosolic protein-tyrosine kinase from bovine platelets
S. Nakamura, S. Yanagi and H. Yamamura 471–477

On the specificity of pig adrenal ferredoxin (adrenodoxin) and spinach ferredoxin in electron-transfer reactions
J.-P. Jacquot, A. Suzuki, J.-B. Peyre, R. Peyronnet, M. Miginiac-Maslow and P. Gadal 629–635

The herpes simplex virus type I DNA polymerase — Polypeptide structure and antigenic domains
K. Weisshart and C. W. Knopf 707–716

Guinea-pig liver leukotriene A_4 hydrolase — Purification, characterization and structural properties
J. Haeggström, T. Bergman, H. Jörnvall and O. Rådmark 717–724

Purification and characterization of an endonuclease from fruiting caps of basidiomycete *Coprinus cinereus*
B. C. Lu, W. Wong, L. Fanning and K. Sakaguchi 725–732

Carbohydrates, lipids and other natural products

Structural analysis of *O*-glycosidic type of sialyloligosaccharide-alditols derived from urinary glycopeptides of a sialidosis patient
J. Van Pelt, D. G. J. L. Van Bilsen, J. P. Kamerling and J. F. G. Vliegenthart 183–187

Pyruvic-acid-containing polysaccharide in the cell wall of *Bacillus polymyxa* AHU 1385
N. Kojima, S. Kaya, Y. Araki and E. Ito 255–260

Biosynthesis of vitamin B-12 in anaerobic bacteria — Experiments with *Eubacterium limosum* and D-erythrose ^{14}C-labeled in different positions
J. R. A. Vogt, L. Lamm-Kolonko and P. Renz 637–640

Physical and inorganic biochemistry

Palmitate binding to serum albumin, measured by rate of dialysis
R. Brodersen, B. Honoré and S. Andersen 45–50

Membranes and bioenergetics

Bacteriorhodopsin precursor is processed in two steps
U. Wölfer, N. A. Dencher, G. Büldt and P. Wrede 51–57

Species differences in the molecular characteristics of vasoactive-intestinal-peptide receptors in the pancreas from rat and guinea-pig
M. Svoboda, P. Poloczek, J. Winand, P. Robberecht and J. Christophe 59–66

On the nature of the interaction between 4,4′-diisothiocyanostilbene 2,2′-disulfonic acid and microsomal glucose-6-phosphatase — Evidence for the involvement of sulfhydryl groups of the phosphohydrolase
M. Speth and H.-U. Schulze 111–117

Methanogenesis and ATP synthesis in methanogenic bacteria at low electrochemical proton potentials — An explanation for the apparent uncoupler insensitivity of ATP synthesis
B. Kaesler and P. Schönheit 189–197

Pore formation by *pho*-controlled outer-membrane proteins of various Enterobacteriaceae in lipid bilayers
K. Bauer, A. Schmid, W. Boos, R. Benz and J. Tommassen 199–205

Respiratory nitrate reductase from *Paracoccus denitrificans* — Evidence for two *b*-type haems in the γ subunit and properties of a water-soluble active enzyme containing α and β subunits
A. L. Ballard and S. J. Ferguson 207–212

Postnatal development of Ca^{2+}-sequestration by the sarcoplasmic reticulum of fast and slow muscles in normal and dystrophic mice
E. Leberer, K.-T. Härtner and D. Pette 247–253

The protection by ascorbate and glutathione against microsomal lipid peroxidation is dependent on vitamin E
H. Wefers and H. Sies 353–357

Cross-linking of α and γ-thrombin to distinct binding sites on human platelets
M. Jandrot-Perrus, D. Didry, M.-C. Guillin and A. T. Nurden 359–367

In vivo and *in vitro* evidence for a proton leakage through the inner mitochondrial membrane in a mutant of *Saccharomyces cerevisiae*
S. Manon, F. Rakotomanana and M. Guérin 399–404

cAMP-dependent protein phosphorylation of membrane proteins in the parotid gland, platelets and liver — Comparison of a 22-kDa phosphoprotein from rat parotid microsomes (protein III) with phosphoproteins of similar molecular size from platelet and liver membranes
G. Thiel and H.-D. Söling 601–609

Lipid–protein interaction – The incorporation of myelin proteolipid apoprotein into phosphatidylcholine bilayers
F. M. Goñi, M. Cózar, A. Alonso, A. A. Durrani, L. M. García-Segura, D. C. Lee, J. Monreal and D. Chapman 641–646

Degradation of the human erythrocyte membrane band 3 studied with the monoclonal antibody directed against an epitope on the cytoplasmic fragment of band 3
M. Czerwiński, K. Waśniowska, I. Steuden, M. Duk, A. Więdłocha and E. Lisowska 647–654

Uptake and intracellular transport in rat liver of formaldehyde-treated bovine serum albumin labelled with ^{125}I-tyramine-cellobiose
S. Misquith, S. Wattiaux-de Coninck and R. Wattiaux 691–697

Metabolism and metabolic regulations

^{13}C-NMR study of glycerol metabolism in rabbit renal cells of proximal convoluted tubules
A. W. H. Jans and R. Willem 67– 73

Rates of production and consumption of phosphatidic acid upon thrombin stimulation of human platelets
O.-B. Tysnes, A. J. M. Verhoeven and H. Holmsen 75– 79

Hormonal regulation of low-density lipoprotein (LDL) receptor activity in human hepatoma Hep G2 cells – Insulin increases LDL receptor activity and diminishes its suppression by exogenous LDL
D. P. Wade, B. L. Knight and A. K. Soutar 213–218

Study of the coinduction by fatty acids of catalase A and acyl-CoA oxidase in standard and mutant *Saccharomyces cerevisiae* strains
M. Skoneczny, A. Chełstowska and J. Rytka 297–302

Variations in guanine-binding proteins (Gs, Gi) in cultured bovine adrenal cells – Consequences on the effects of phorbol ester and angiotensin II on adrenocorticotropin-induced and cholera-toxin-induced cAMP production
M. Begeot, D. Langlois, A. Penhoat and J. M. Saez 317–321

Control analysis of metabolic networks – 1. Homogeneous functions and the summation theorems for control coefficients
C. Giersch 509–513

Control analysis of metabolic networks – 2. Total differentials and general formulation of the connectivity relations
C. Giersch 515–519

The control of glycogen metabolism in yeast – 1. Interconversion *in vivo* of glycogen synthase and glycogen phosphorylase induced by glucose, a nitrogen source or uncouplers
J. François, M. E. Villanueva and H.-G. Hers 551–559

The control of glycogen metabolism in yeast – 2. A kinetic study of the two forms of glycogen synthase and of glycogen phosphorylase and an investigation of their interconversion in a cell-free extract
J. François and H.-G. Hers 561–567

Maitotoxin triggers the cortical reaction and phosphatidylinositol-4,5-bisphosphate breakdown in amphibian oocytes
V. Bernard, A. Laurent, J. Derancourt, M. Clément-Durand, A. Picard, C. Le Peuch, P. Berta and M. Dorée 655–662

Signal transduction and molecular neurobiology

Identification of a myometrial oxytocin-receptor protein
F. Fahrenholz, M. Hackenberg and M. Müller 81– 85

Major pertussis-toxin-sensitive GTP-binding protein of bovine lung – Purification, characterization and production of specific antibodies
R. Morishita, K. Kato and T. Asano 87– 94

Semisynthetic derivatives of inositol 1,4,5-trisphosphate substituted at the 1-phosphate group – Effects on calcium release from permeabilized guinea-pig parotid acinar cells and comparison with binding to aldolase A
V. Henne, G. W. Mayr, B. Grabowski, B. Koppitz and H.-D. Söling 95–101

The bovine cardiac receptor for calcium channel blockers is a 195-kDa protein
T. Schneider and F. Hofmann 369–375

Insulin-like growth factor I receptors on mouse neuroblastoma cells – Two β subunits are derived from differences in glycosylation
A. Ota, G. L. Wilson and D. LeRoith 521–530

Involvement of N_i protein in the functional coupling of the atrial natriuretic factor (ANF) receptor to adenylate cyclase in rat lung plasma membranes
Th. J. Resink, M. P. Panchenko, V. A. Tkachuk and F. R. Bühler 531–535

Selective distinction at equilibrium between the two α-neurotoxin binding sites of *Torpedo* acetylcholine receptor by microtitration
P. Marchot, P. Frachon and P. E. Bougis 537–542

Selective loss of binding sites for the iodinated α-neurotoxin I from *Naja mossambica mossambica* venom upon enzymatic deglycosylation of *Torpedo* electric organ membranes
S. Zeghloul, P. Marchot, P. E. Bougis and C. Ronin 543–550

New insights into maitotoxin action
F. Sladeczek, B. H. Schmidt, R. Alonso, L. Vian, A. Tep, T. Yasumoto, R. N. Cory and J. Bockaert 663–670

Molecular cell biology

Characterization of covalently cross-linked somatostatin receptors in hamster beta cell insulinoma
P. Cotroneo, J.-C. Marie and G. Rosselin 219–224

Regulation of manganese superoxide dismutase in *Saccharomyces cerevisiae* – The role of respiratory chain activity
C. A. M. Westerbeek-Marres, M. M. Moore and A. P. Autor 611–620

Topogenic signals in integral membrane proteins
G. von Heijne and Y. Gavel 671–678

Post-translational translocation of polypeptides across the mammalian endoplasmic reticulum membrane is size and ribosome dependent
T. Roitsch and L. Lehle 699–705

Developmental biochemistry and immunology

Regeneration after cardiotoxin injury of innervated and denervated slow and fast muscles of mammals — Myosin isoform analysis
A. d'Albis, R. Couteaux, C. Janmot, A. Roulet and J.-C. Mira 103–110

Differential acetylation of core histones in rat cerebral cortex neurons during development and aging
B. Piña, P. Martínez and P. Suau 311–315

Indexed in *Current Contents*
